

# Effectiveness tested against Coronavirus

**NEW** Portable Solution  
**SUPER FAST**

**UNI EN**  
14476:2019

With micro-particles, the sanitizing steam **penetrates every silt and surface, sanitizing totally the air and the environment**, taking care of the safety and health protection, ensuring in complete autonomy sanitization **up to 8 months**.

The virucidal efficacy of the sanitizing liquid used by **Sany Safe is certified** in the laboratory and complies with the European standard **UNI EN 14476: 2019**.

**SANY SAFE**  **SUPER FAST**

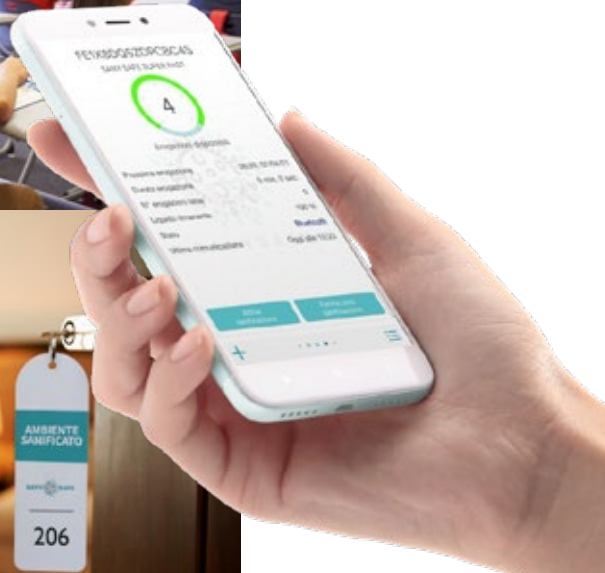

## Living in a safe and healthy environment it's essential.

SANY SAFE is the solution: a powerful sanitiser that, by spreading in the air by a hot vaporization /aerosolization, **thoroughly sanitises any environment**, depositing uniformly on all surfaces of the room, with maximum reliability and safety.

The special non-toxic formulation of the sanitizer is able to safely eradicate pathogens such as viruses, germs, bacteria, fungi and molds. The mixture atomized in the air persists for several hours, breaking down any particles, even the smallest ones and reaching the most inaccessible places.

The sanitization time varies according to the size of the room by the chosen intensity (low, medium and high) and allows sanitizations even up to 8 months.

It is recommended to associate the normal cleaning procedures and environmental optimization with the onsite sanitization treatment, as per the provisions given by the WHO (World Health Organization).

# Why Sany Safe Super Fast?

## Effectiveness of environmental sanitization at 360°

The sanitization technique used with **hot vaporization / aerosolization**, allows to spread in the environment invisible micro-particles that atomized in the air, **are capable to penetrate in every silt, eradicating all bacteria, viruses, germs, fungi and molds already present in the air and on surfaces.**

## Certification UNI EN 14476:2019 against Coronavirus

The virucidal efficacy of the sanitizing liquid used by **Sany Safe is certified** in the laboratory and complies with the European standard **UNI EN 14476: 2019.**

## Ready to use

Once powered, you can activate the sanitization using the **start BUTTON** or by the **dedicated APP.**

## Lighthweight and easy to handle

Thanks to the integrated internal tank (2 liters capacity) you can **easily move and transport** SANY SAFE Super Fast from one environment to another. The simple refill of the tank of 5, 10 or 25 liters allows you to perform many sanitization cycles, according to your need.

## Easy to program by the APP

SANY SAFE has a programmed weekly schedule, which allows an immediate use. Thanks to the simple and intuitive configuration APP, you can at any time **manage SANY SAFE and customize volumes, frequency and intensity of the system.**

## Long autonomy, up to 8 months

SANY SAFE, depending on chosen type of sanitization and of the tank size installed, it is able to ensure an **autonomy** that can reach even **up to approximately 8 months.**

## Energy saving

SANY SAFE has been designed to dynamically manage consumption. During the time slots when the steam diffusion is not performed, SANY SAFE **disactivates automatically, saving energy.**

## No toxic, freshness in the air!

The mixture atomized in the air does **not present any toxicity** (see Lab Test University of Turin) and releases into the environment a pleasant fragrance of freshness. It is however recommended to ventilate the premises before to join it.

## SIM CARD included

The SANY SAFE Super Fast 4G model includes for free **1 SIM CARD activated for 2 years.**

\*(available for EU countries).

## Bluetooth

The SANY SAFE Super Fast BT allows **connection to the APP by Bluetooth.**

Technical features	SANY SAFE SUPER FAST BT (BLUETOOTH)	SANY SAFE SUPER FAST 4G
Coverage volumes	from 20 m <sup>3</sup> to 300 m <sup>3</sup>	
Built-in tank capacity	2 L	
Recharge tanks available	5 L - 10 L - 25 L	
Sanitization efficacy Once a day	low intensity: workplaces with only the presence of their staff medium intensity: places with controlled public attendance strong intensity: places with uncontrolled crowds	
Special functions	Status LED; Power button; Energy saving deactivation; Off boiler in stand by; Buzzer deactivation	
Programming by APP	Environment volume Sanitization intensity Sanitization time scheduling 4 times/days sanitization time scheduling Time zone	
User management by APP	Manual activation/deactivation of sanitization Manual activation/blocking of sanitization in progress Activation/reactivation of sanitization cycle Disable sanitization for n° of days Visualization of sanitizations carried out and available Faults visualization	
Power supply	230 Vac / 110 Vac (optional on request)	
GSM or BLUETOOTH module included	Connection to the App Sany Safe by Bluetooth	GPRS always connected with CLOUD
	Programming configuration parameters with APP Sany Safe	Programming configuration parameters with APP Sany Safe
	User management with APP Sany Safe	User management with APP Sany Safe
	Automatic time synchronization in GPRS	Automatic time synchronization in GPRS
Sim Card	-	Sim Card Included and active for 2 YEARS (available for all EU countries)
Dimensions (LxHxD) mm	350 x 250 x 238 (with handle)	
Weight Kg.	8,6 Kg (with empty tank)	

Sany Safe is not a MSD (Medical Surgical Device)
